SKILLS

- QA
- Automation Testing
- Java
- Playwright
- Selenium WebDriver
- Cypress
- Tricentis Tosca
- Appium
- Karate Framework
- Postman
- JMeter
- Jenkins
- Git/GitLab
- JIRA
- TestRail

Alan Diego Silva

Senior QA Automation Tester

Personal Statement

Highly accomplished Senior QA Automation Tester with over 9 years of experience in Quality Assurance for web, mobile, and client-server applications across finance, healthcare, retail, insurance, and telecommunications. Deeply embedded in agile product development lifecycles, collaborating early with Product Owners and Engineers to define quality standards, prevent defects, and build robust automated testing solutions. Specializing in Playwright-based E2E automation, API testing, CI/CD integration, and continuous QA process improvement. EU-based and seeking remote opportunities to ensure high-quality deliverables from the earliest stages.

Work Experience

QA Senior Automation Lead — Surepay | February 2025 – Present

- Led the entire QA function, from strategic planning to execution (the last one in Hexis), collaborating closely with Product Owners and Engineering teams to define quality standards and test cases before development begins
- Actively triaged incoming bugs, reproduced issues, documented detailed findings, performed root-cause analysis, and assigned defects appropriately while holding engineering teams accountable for test coverage
- Managed and mentored a team of QA engineers, conducting regular 1:1s, performance evaluations, and career development planning
- Architected and built a new Playwright-based end-to-end automation framework from the ground up, designing and maintaining reliable automated tests

Azure DevOps

HP ALM

SQL/MySQL

BDD (Cucumber)

Agile (Scrum/Kanban)

API Testing

Ranorex

UFT/QTP

Salesforce Testing

Linux Shell & Troubleshooting

LANGUAGES

- Portuguese (Native)
- English (Professional Fluent)

INTERESTS

- Cinema
- Music
- Comics
- Books

- Managed functional and non-functional tests (performance, security, usability, scalability), including API and backend service validation
- Inspected logs and troubleshot issues in Linux-based AWS environments using Kibana, Elastic, and shell commands (grep, service checks)
- Integrated automated testing into CI/CD pipeline using Jenkins and GitHub, contributing to continuous improvement of QA processes and tooling
- Mentored QA engineers and managed defect lifecycle
- Collaborated directly with clients and developers
- Tools: Playwright, JMeter, Postman, TestRail, JIRA, Confluence, AWS, Kibana, Elastic

QA Senior Automation Tester — Experis | December 2024 – February 2025

- Built automation frameworks and wrote automated tests
- Executed exploratory, manual, and automated testing
- Developed test plans and test cases
- Conducted performance testing
- Worked directly with clients
- Created and maintained defect reports with root cause analysis
- Integrated automated testing with CI pipelines
- Tools: Playwright, JIRA, Confluence, TestRail

Senior QA Automation Tester — BOOST IT Portugal | May 2022 – December 2024

- Analyzed project risks and defined scope of testing activities with cost vs resource estimation in agile/Scrum teams
- Designed test case campaigns and specified test cases in Gherkin format, collaborating with product and engineering to ensure coverage before coding
- Defined test automation strategies, plannings, and cost estimations
- Developed script architecture and automated functional and non-regression tests, including E2E and API services
- Automated web services testing using Postman and framework-integrated approaches
- Managed bug lifecycle and provided reporting to management
- Tools: Selenium WebDriver (JUnit), Cucumber (BDD/Gherkin), Cypress, Karate Framework, Postman,

Playwright, HP ALM, JIRA, Azure DevOps, Bugzilla, Jenkins, Git, GitLab
- Programming: Java, SQL, Shell, JavaScript, Python

Senior QA Automation Tester — SQS Portugal | March 2021 – May 2022

- Worked on projects for BNP Paribas, handling complex insurance policyholder information
- Designed and implemented Selenium WebDriver automation frameworks for smoke and regression suites using JUnit/TestNG and ANT
- Formulated and executed test cases based on requirements
- Created automated test cases and suites using Selenium 2 (IDE and WebDriver)
- Collaborated closely with developers

QA Advanced Automation Tester — Altran (Capgemini) | August 2019 – March 2021

- Built and maintained automation frameworks and wrote automated tests
- Conducted exploratory, manual testing, and developed test plans/cases
- Performed performance testing
- Created and maintained defect reports with root cause analysis
- Integrated automated testing with CI pipelines
- Created and maintained VM farms for testing environments

QA Automation Tester — Accenture | March 2017 – July 2019

- Automated functional test cases for e-commerce and banking platforms on projects for major Brazilian clients: Santander Bank (2017), Maffre Seguros (2018), and Bradesco Bank (2018–2019)
- Performed comprehensive QA on Salesforce CRM implementations, including custom objects, workflows, validation rules, Apex classes, triggers, Lightning components, and integrations with external systems
- Designed and executed automated test scripts using Selenium WebDriver and Appium to validate Salesforce functionality, data migration, reports, dashboards, and user permissions

- Conducted end-to-end testing of Salesforce Lightning Experience and Classic interfaces, ensuring compliance with banking regulations and business requirements
- Utilized Salesforce tools (Data Loader, Workbench, Developer Console) and wrote SOQL queries for test data preparation and validation
- Utilized Appium, Cucumber, BDD, Selenium WebDriver, Tricentis TOSCA, Ranorex Studio, UFT/QTP, JMeter
- Wrote automation scripts across mobile platforms using Appium
- Developed scripts in JavaScript, Java, Ruby, C#, Python
- Integrated with Jenkins and Bamboo
- Managed version control with Git/Stash and defects in JIRA

Network Engineering Analyst — GMUD | September 2016 – February 2017

- Provided telephone support and simulated problems for resolution
- Participated in continuous process improvement initiatives
- Prepared weekly management reports
- Provided hardware support on Enterprise Environment

Technical Support Analyst — IEL | April 2015 – September 2016

- Provided support for hardware, software, and network issues (~50 weekly tickets)
- Automated data backup processes
- Managed user accounts in Active Directory
- Provided tier-I support for 850+ users

Professor — Prefeitura da Cidade do Recife/Governo do Estado de Pernambuco | June 2005 – April 2015

- Challenged and motivated students through in-depth lectures
- Participated in student recruitment and placement activities
- Served on academic and administrative committees
- Developed and maintained online courses

Education

- Technical Degree in Mobile Systems Development — IFSP, Brazil (January 2017 – December 2017)
- Technical Degree in Networks Management — SENAI, Brazil (April 2014 – December 2016)
- Technical Degree in Systems Development — ETEPAM, Brazil (March 2014 – December 2016)
- Bachelors in Education — UFPE, Brazil (August 2006 – December 2012)

Certifications

- DevOps Essentials Professional Certificate (DEPCP) by Certiproof (2020)
- Scrum Foundation Professional Certificate (SFPC) by Certiproof (2020)
- Kanban Foundation Certificate by Kanban Institute (2020)
- Test Design Specialist Level 1 & 2 by Tricentis (2018)
- Automation Specialist Level 1 & 2 by Tricentis (2018)
- Automation Engineer Level 1 by Tricentis (2018)
